

# FORMULE DE LA MASSE VOLUMIQUE à savoir

La masse volumique

The diagram illustrates the formula for density,  $\rho = \frac{m}{V}$ , within a white rounded rectangle. To the left of the rectangle, a yellow arrow points from the text  $\text{kg/m}^3$  to the symbol  $\rho$ , and a green arrow points from  $\text{g/cm}^3 = \text{g/mL}$  to the same symbol. To the right of the rectangle, a yellow arrow points from the symbol  $m$  to the text  $\text{kg}$  and  $\text{g}$ , and another yellow arrow points from the symbol  $V$  to the text  $\text{m}^3$  and  $\text{cm}^3 = \text{mL}$ .

On peut calculer la masse volumique pour un solide ou un liquide
